

BICYCLE DISC BRAKE CLEANER

Optimize Your Braking Performance!

Finish Line's Disc Brake Cleaner is engineered to rapidly clean disc brake rotors and pads to optimize disc brake performance. Using an acetone-free formula, Bicycle Disc Brake Cleaner decontaminates braking surfaces by flushing out dirt and oil residue, and melting away baked-on brake glaze.

Designed to leave zero residue after application, Finish Line's Disc Brake Cleaner displaces any moisture built up on the pad or rotor, resulting in improved and predictable braking, and reduced brake squeal. With the unique characteristic of being acetone free, Finish Line's Bicycle Disc Brake Cleaner is strong enough to clean the dirtiest rotors, yet safe enough to use around paint, carbon fiber and plastic parts.

FEATURES & BENEFITS

Fast, Residue Free Treatment:

Easy one step process, spray and ride

Cleans Both Pads and Rotors:

Eliminates squealing

Removes Glaze and Contaminants:

Provides optimal braking performance

PRODUCT INFORMATION

10 oz Aerosol

CASE QTY: 6

MSRP: \$8.99
