

Finish Line™ **WET LUBRICANT**

Cross Country™ Synthetic Bicycle Lubricant *Withstands Extreme Pressures, Extends Lubrication Intervals*

Finish Line Wet Lubricant is formulated with durable, high viscosity synthetic oils, water-repelling polymers, anti-wear additives and friction modifiers. This is Finish Line's strongest, longest-lasting, most water-resistant lubricant. Wet Lubricant is a heavier, wet-style lube that requires a little more attention to drivetrain cleanliness, but it provides the ultimate in lubricity, corrosion protection, smoothness, and sound dampening.

Wet Lubricant delivers race-proven performance through 100-plus mile rides. It performs in muddy off-road conditions, in long rainy rides, and in foggy salt-air conditions. It is often the preferred lubricant for Finish Line's sponsored ProTour teams.

FEATURE

- **Extreme Pressure Additives – Anti-Wear Agents & Friction Modifiers**
- **Wet Weather Formulation – Rust Inhibitors & Water Repelling Polymers Added**
- **100% Synthetic Formula**

BENEFIT

- **Superior Lubrication – Super Durable, Reduces Chain Wear**
- **Protects Chain in Wet Conditions – Prevents Rust and Does Not Wash Off**
- **Temperature Resistant & Long-Lasting – Clean, Non-Toxic Oils**

SAFETY, HEALTH AND THE ENVIRONMENT:

- Features inherently biodegradable synthetic oils, which means that more than 60% of the product's ingredients will degrade within 28 days, when exposed to land-mass matter.
- This product is non-toxic to the environment when used in quantities and applications as intended.
- Contains NO carcinogenic or hazardous air polluting (HAP) ingredients and emits NO Volatile Organic Compounds (VOCs).
- REACH compliant for Europe. All ingredients used are listed with all major worldwide chemical inventories.
- Squeeze bottles are currently packaged in recyclable #2 HDPE, and in June 2010, bottle material will change to #1 PET. Aerosols use recyclable steel cans and do not use CFC's / ozone depleting propellants.
